

Remark

Applicants respectfully request reconsideration of this application as amended. No claims have been amended. No claims have been cancelled. Therefore, claims 1-68 are present for - examination.

35 U.S.C. §102 Rejection*Bruckert et al.*

The Examiner has rejected claims 1-68 under 35 U.S.C. §102 (e) as being anticipated by Bruckert et al., U.S. Patent No. 5,430,761 ("Bruckert"). This Bruckert patent is no different from the previously cited Bruckert patent (U.S. Patent No. 5,355,516) as concerns the present application. In the current Bruckert patent, standard GSM protocols are used (7:25, 7:48, etc) with the exception that additional information regarding an offset subspectrum is included within the assignment message (7:55-60). The BCCH and CCCH are otherwise the same as conventional GSM messages.

Conventional GSM messages have been discussed extensively in prior papers to the Examiner. See, for example, Applicants amendment submitted April 6, 2004. Applicants submit that the present claims clearly distinguish the present invention from conventional GSM protocols and from the GSM modifications proposed in Bruckert. The rejections as to all claims is respectfully traversed.
